### Simba Institute

Phone No: +91 81400 90645

## PROJECTS

### Create a system for getting real time weather information from API.

This tool serves the information about weather from API and help us to know what situation is there in any specific city. With it you can know the predicted time of sunrise and sunset of particular city.

- **GitHub:** <https://github.com/antala123/Weather-App.git>
- **Live:** <https://weather-app-topaz-one-96.vercel.app/>

### Create a system for shopping to food item

Developed this project with React Js. There are many functionalities in this project like Add to cart, Fake api calling etc.

- **GitHub:** <https://github.com/antala123/Food-Ordering-App.git>
- **Live:** <https://food-ordering-app-nu-five.vercel.app/>

### Create a system for REST API

That data can be used to GET, PUT, POST and DELETE data types, which refers to the reading, updating, creating and deleting of operations concerning resources.
